Middle School Mathematics Science Technology Center ranked the #1 Middle School in Michigan

Warren, MI – The WCS Middle School Mathematics Science Technology Center was recently ranked the #1 Middle School in the State of Michigan by U.S. News and World Report.

On October 12, the U.S. News and World Report released its 2022 Best K-8 Schools Rankings by state. The publication analyzed 102,610 pre-K, elementary and middle schools. MS2TC placed first out of 818 middle schools statewide.

Schools are ranked on their performance on state-required tests, graduation, and how well they prepare their students for high school.

Ninety-eight percent of MS2TC students scored at or above the proficient level for math, and 98 percent scored at or above that level for reading.

MS2TC opened in September 2013 and is patterned after the district's Macomb Mathematics Science Technology Center. MS2TC fosters excellence and vision in teaching, learning, serving, and discovering relationships between mathematics, science, technology, and English language arts, serving high ability middle school students.

“What an honor for the Middle School Mathematics Science Technology Center and the district to receive a number one ranking by U.S. News and World Report.” Superintendent Robert D. Livernois, Ph.D. said. “Our MS2TC students and staff work extremely hard to maintain a high level of academic excellence in our program. I am proud of their hard work and dedication.”
